

Communicate Weekly to the White House Office of Health Reform

Help make this massive communications activity "bigger than life" to help get support for non-profit single-payer national health insurance as per H.R. 676.

Those who receive monthly reminders: 1) get suggested notes enough for each week
2) will be notified when this activity stops.

http://www.goodhealthforall.org/pages/Get_Monthly_Reminders

Plan the timing of your communications. Pick a day of the week.

Suggestion: send a note ... or send a note and make a call ... every week until further notice.

<p>Send a note by U.S. Mail -- the best option</p>	<p>"Please support non-profit single-payer national health insurance as per H.R. 676." Include a little more, such as a note suggestion in the most recent monthly reminder. There are enough suggestions for each week when you get the monthly reminders. Sign your name. Print your name and address, at least your city and state.</p> <p>Mail to: Jeanne Lambrew, Deputy Director White House Office of Health Reform 200 Independence Ave. S.W. Washington, D.C. 20201</p>
<p>Send via fax -- the second best option -- at your computer at no cost</p>	<ol style="list-style-type: none">1. Go to http://faxzero.com. Enter 2026907203 for the fax number and "Jeanne Lambrew" for the recipient name at "Receiver Information" at the right. Enter your name and your e-mail address at "Sender Information" on the left.2. Copy the note above and paste it into the large text box at "Fax Information". Enter the "Confirmation Code" that you see on the screen exactly as you see it displayed.3. Select "Send Free Fax Now".4. You will receive an e-mail; you must select a link there to confirm your e-mail address before the fax is sent.5. When the fax gets sent, you will receive an additional e-mail
<p>Send via e-mail? -- a distant last choice</p>	<p>This communications activity is too critical an activity in too critical a year to send these communications by e-mail (jeanne.lambrew@hhs.gov.)</p> <p>We need to flood this office with paper copies of our input every week.</p> <p>It is much less expensive in time, money and effort for us to do a million notes to Jeanne Lambrew each week and a million communications to our U.S. Representatives each month than it is for us to get ourselves to Washington, D.C. for a million-person march or do other big activities. We need to keep the pressure on every month and make a visible presence via the mail and faxes.</p>

Call

202-456-1414 You must let the entire greeting play and wait for an operator to answer the phone. If you press zero, you will simply cause the recording to restart and play again. The entire greeting plays multiple times until an operator answers. Then **ask for the Office of Health Reform.**

When you are connected, tell whoever answers that you would like to leave a brief message for Jeanne (pronounced "Jean") Lambrew.

"Please support non-profit ... single-payer ... national health insurance, as per House Resolution 676. My name is (say at least your first name) and I live in (say your state's name)."

Important: Do not ask to speak with Ms. Lambrew, just leave the message. It's important to have thousands of citizens leaving her a message and/or sending her a note. We want to make certain that she and President Obama know what we want. The numbers of citizens are most important. Also, avoid leaving your message on voice-mail. Save voice-mail space for those who can only call after normal business hours.

Select the link to the pdf version at the top of the page.

Do you consider it a problem that 42% of Americans under age 65 are either uninsured or under-insured? (95% of Americans do.) Then consider that the 42% is certainly now closer to 50%, which means that between 130 and 135 million Americans are in that situation. That number is zero in all other industrialized countries.

Do you think that United States' citizens should have same kind of peace of mind about (lack of) health care bills that citizens in all other industrialized countries have?

Then please do monthly communications to the U.S. Congress.

Information is available here:

Making calls: <http://www.goodhealthforall.org/pages/Call>
http://www.goodhealthforall.org/files/Make_Calls_to_Congress.pdf

Sending notes: <http://www.goodhealthforall.org/pages/Send>

At this web page you can get a report customized for your district.

Remember that e-mail reminders each month with a set of suggestions for the wording of your monthly note are available here:

Reminders:

http://www.goodhealthforall.org/pages/Get_Monthly_Reminders

The **United States spends 250% more per person** for every citizen than the average of all the other industrialized countries, but it's **life expectancy dropped from 27th to 30th** and its ability to minimize deaths due to preventable diseases went from 15th of 19 countries to 19th of 19 countries ... and roughly half of its citizens have adequate insurance.
