

Million Letters Campaign

to get improved Medicare for All

One of the Biggest Grassroots Activities Ever Seen in the U.S.

1 million participants among 78.5 million uninsured and underinsured and millions more who are concerned about America's health care

Status: All other free-market, high-income industrialized countries have non-profit national health insurance for all medically-necessary care for every man, woman and child.

Peace of Mind: In those other countries residents, including Americans living/working there, get health care and do not receive major medical bills. Reason: simple, cost-efficient way for people to pay & be covered at a much lower cost.

Mystery: People in other countries are amazed. They ask Americans why we continue to deny ourselves the advantages of non-profit national health insurance (over). We must communicate to get what we and our country need.

Here's what to do in 10 minutes to help get peace of mind!

<p>1 letter in the U.S. Mail to 1 person (U.S. Representative) 1 time per month after getting 1 reminder on the 1st of the month</p>

- Go to www.medicareforall.org
- Sign up and **get monthly reminders with 1-sentence suggestions** for an optional note to add by hand to help increase the value of your letter.
- **Print the prepared, pre-addressed letter** to your U.S. Representative, optionally add a hand-written note, date & sign, print your name and address, and mail.

Million Letters for Health Care

to get improved Medicare for All:
non-profit single-payer national health insurance

Advantages: add years to our lives, add life to our years and save money

- All necessary care: see “Benefits” at the website.
- Everyone included, pre-natal to the end-of-life.
- Dramatically less bureaucracy = lower cost.
- No more rationing based on ability to pay.
- Freedom to choose doctors, medical facilities, professions, jobs, and employers.
- Physician impact: lower costs to run private practices; more time for patients.
- Lower business costs = recovery & creation of jobs.
- A healthier workforce. Our life expectancy is 30th in the world; we rank 19th of 19 countries in minimizing deaths due to preventable diseases! When people can get to a doctor, we'll do better!
