

What We Need: everyone is insured automatically

Single-Payer: Improved Medicare for All

Less government. **No** health insurance “middlemen”.
Best version of national health insurance. People (who can) pay into a **single fund** that pays medical bills. Very little or no additional costs. All medically-necessary care for all ages.

No major medical bills. Always have insurance.

Americans were being taught to fear national health insurance, while other free-market countries were implementing it. People in the other countries see the doctor more often and live longer. **Americans living & working in other countries like it.**

Learn more about single-payer and how to help get it:

How We Can Get Single-Payer

Communicate to Our U.S. Representatives

Other free-market countries have national health insurance.
Barack Obama recommended we send 1-2 thousand letters to every U.S. Representative. Letters are to be sent by U.S. Mail.

The **Million Letters for Health Care Campaign** helps minimize the effort. Monthly reminders guide you to print a prepared letter including the name and address of your U.S. Representative. Suggestions each month help you personalize your letter. Spend 10-15 minutes per month or also do low-cost “extras” that take little time, including quick toll-free calls.
