

The Honorable Nick J. Rahall II
United States House
Washington, D.C. 20515

Dear Representative Rahall,

I believe that the United States needs improved Medicare for All.

Citizens in other free-market countries have no major medical bills. They contribute to a national fund, similar to our traditional Medicare, that pays the bills. Citizens have little or no additional cost for health care. I want that for us. Medicare can be improved and expanded to cover everyone in the country.

Our economy is in critical need of the cost-efficiency that traditional Medicare had prior to the Medicare Modernization Act of 2003.

Please support and actively promote improved Medicare for All via the best solution: single-payer health care, as per U.S. House of Representatives Bill No. 676.

We can have a healthier economy with healthier people!

Sincerely yours,
